DOASENSE expands availability of its products to Portugal and Spain, partners with BIOMETA

HEIDELBERG – 18 January 2021 – DOASENSE GmbH, an in vitro diagnostics company focused on the development and commercialization of innovative rapid tests, today announced that it has partnered with BIOMETA Tecnologia y Sistemas, S.A. as exclusive distributors of DOASENSE products in Portugal and Spain.

We are thrilled to announce our new partnership with BIOMETA as our exclusive distributor for Portugal and Spain. BIOMETA's extensive experience and successful track record in the field of point-of-care IVD makes them the ideal partner for introducing our DOAC Dipstick product suite for rapid DOAC testing in the region.

"DOASENSE provides an ideal complement to our portfolio of point-of-care solutions dedicated to coagulation management. BIOMETA is delighted to be the company bringing this unique and innovative test to our customers in Spain and Portugal" said Alfonso Rivaya, CEO of BIOMETA.

The agreement is effective immediately.

BIOMETA can be reached at info@biometa.es and www.biometa.es

About the DOASENSE Product Suite:

The CE-marked and TGA registered DOAC Dipstick is a qualitative all-in-one POCT for both direct factor Xa and thrombin inhibitor DOACs. The test is performed using a urine sample from the patient. The DOAC Dipstick provides results within 10 minutes where they are needed most: at the point-of-care. Specially developed accessories complete the first suite of CE-marked products for rapid point-of-care DOAC testing: Objective documentation of results can be achieved with the compact, automated DOASENSE Reader. And the DOASENSE Control Urines are specially designed reference substances to support quality assurance needs. The in vitro diagnostic products are for professional use only.

About DOASENSE:

DOASENSE is a medical technology company with operations in Heidelberg, Germany. DOASENSE's exclusive, patent protected technology changes the way of testing for direct oral anticoagulants, serving an unmet clinical need.

The company is open to distributor inquiries for further broadening the international market presence of its products.
